

§212.6

36 CFR Ch. II (7–1–03 Edition)

and that, therefore, should be decommissioned or considered for other uses, such as for trails. Decommissioning roads involves restoring roads to a more natural state. Activities used to decommission a road include, but are not limited to, the following: reestablishing former drainage patterns, stabilizing slopes, restoring vegetation, blocking the entrance to the road, installing water bars, removing culverts, reestablishing drainage-ways, removing unstable fills, pulling back road shoulders, scattering slash on the road-bed, completely eliminating the road-bed by restoring natural contours and slopes, or other methods designed to meet the specific conditions associated with the unneeded road. Forest officials should give priority to decommissioning those unneeded roads that pose the greatest risk to public safety or to environmental degradation.

(c) *Cost recovery on forest service roads.* The Chief may determine that a share of the cost of acquisition, construction, reconstruction, improvement, or maintenance of a road, or segment thereof, used or to be used for commercial hauling of non-Federal forests products and other non-Federal products, commodities and materials, should be borne by the owners or haulers thereof. The Chief may condition the permission to use a road, or segment thereof, upon payment to the United States of the proportionate share of the cost and bearing proportionate maintenance as determined to be attributable to the owner's or hauler's use in accordance with §212.9. This condition to use roads would apply where the owners or haulers:

(1) Have not shared in the cost of acquisition, construction, reconstruction, or improvements, and

(2) Have not made contributions to pay their proportionate share of the costs.

(d) *Maintenance and reconstruction of forest service roads by users—(1) Maintenance.* The Chief may require, but not in conflict with an existing permit, easement, contract, or other agreement, the user or users of a road, including purchasers of Government timber and other products, to maintain the roads in a satisfactory condition commensurate with the particular use

requirements of each. The maintenance to be borne by each user shall be proportionate to total use and no individual user shall be required to perform or bear the costs of maintenance other than that commensurate with his use.

(2) *Reconstruction.* The Chief may require, but not in conflict with an existing permit, easement, contract, or other agreement, the user or users of a road to reconstruct it when, at the time the use is requested, reconstruction is determined to be necessary to accommodate his use.

(3) *Deposits in lieu of performance.* If the maintenance or reconstruction cannot be so provided or if the Chief determines that maintenance or reconstruction by a user would not be practical, the Chief may require that sufficient funds be deposited by the user to provide his portion of the total maintenance or reconstruction costs. Deposits made to cover maintenance or reconstruction of roads shall be used for the purposes deposited, except that:

(i) Deposits received for work on adjacent and overlapping areas may be combined when it is the most practicable and efficient manner of performing the work, and cost thereof may be determined by estimates, and

(ii) Unexpended balances upon accomplishment of the purposes for which deposited shall be transferred to miscellaneous receipts or refunded.

(e) *Deposits for making delayed payments to cooperator.* Any fees or other collections received by the Chief under the terms of an agreement or other document providing for delayed payments to the Government's cooperator for use of a road shall be placed in a fund available for making these payments.

[39 FR 27649, July 31, 1974, as amended at 42 FR 2957, Jan. 14, 1977; 43 FR 20007, May 10, 1978; 62 FR 58654, Oct. 30, 1997. Redesignated and amended at 62 FR 58654, Oct. 30, 1997; 66 FR 3217, Jan. 12, 2001]

§212.6 Ingress and egress.

(a) *Policy in acquiring and granting access.* To assure effective protection, management, and utilization of lands administered by the Forest Service and intermingled and adjacent private and public lands, and for the use and development of the resources upon which

Forest Service, USDA

§212.7

communities within or adjacent to the National Forests are dependent, the Chief shall as promptly as is feasible obtain needed access thereto and shall grant appropriate access across National Forest and other lands and easements administered by the Forest Service to intermingled or adjacent landowners. Construction, reconstruction or maintenance of a road or highway requires written authorization.

(b) *Actual settlers and other persons residing within the National Forests and other areas administered by the Forest Service.* Actual settlers and other persons residing within the National Forests and other areas administered by the Forest Service shall be permitted ingress and egress over the same and use of existing National Forest System roads and trails in order to reach their homes and to utilize their property: Provided, such ingress and egress or use shall conform to rules and regulations governing the protection and administration of the lands and the roads or trails to be used.

(c) *Others.* Entering upon the National Forests and other lands administered by the Forest Service and use of existing National Forest System roads and trails shall be permitted for all proper and lawful purposes subject to compliance with rules and regulations governing the lands and the roads or trails to be used.

§212.7 Access procurement by the United States.

(a) *Existing or proposed forest development roads which are or will be parts of a system of a State, county, or other local subdivision.* National Forest System roads which are or will be parts of a road system of a State, county, or other local subdivision and are on rights-of-way held in the name of the State, county, or other local subdivi-

sion may be constructed, reconstructed, improved or maintained by the Forest Service when there is an appropriate agreement with the State, county, or other local subdivision under authority of 23 U.S.C. 205: *Provided*, Such construction, reconstruction, improvement, or maintenance is essential to provide safe and economical access to the National Forests and other lands administered by the Forest Service.

(b) *Acquisition of easements and rights of use.* Except as otherwise provided in the regulations of this part, easements for road and trail construction across non-Federal lands and easements or rights of use over non-Federal roads and trails will be acquired in the name of the United States of America and its assigns. The easements or rights of use may be acquired by purchase, condemnation, donation, or as a reciprocal for permits or easements for roads or trails to be constructed or for easements over or permits to use existing roads or trails.

(c) *Methods of compensation for easements and rights of use acquired by the United States.* Compensation in negotiated acquisitions may be:

(1) By payment from appropriated funds;

(2) Pursuant to reservation in the grant of easement to the United States whereby the grantor reserves the right to require haulers of Federal timber or other Federal products over the road conveyed or thereafter constructed by the grantor to make payments to the grantor in accordance with the terms of the reservation;

(3) By granting reciprocal rights; or

(4) By a combination of these methods.

(d) *Cooperative construction and use agreements.* Where areas, partly lands administered by the Forest Service and partly private or other ownership are undeveloped or inadequately developed by roads, the Chief will, to the extent feasible and advantageous to the United States, join in planning, constructing, reconstructing, improving, maintaining, and using an adequate road system on the basis of each party bearing the proportion of the cost attributable to the anticipated benefits as set forth in §212.9.
